Talentum[®] TT² Calibration Kit

The TalentumTT² calibration kit enables in-situ adjustment of installed Talentum[®] Flame Detectors, bringing them back to factory fresh performance, extending their service life.

The kit comprises an infra-red excluding Shroud, needed to eliminate potential interference from external warm bodies, and an interface cable to attach to a Talentum[®] service port.

Simply hook the Shroud onto the front of the TalentumTT², and connect the interface cable to the front of the Talentum[®] Flame Detector to recalibrate. Then, select the **Recalibrate Talentum** option from the TalentumTT² main menu, and follow the on screen prompts.

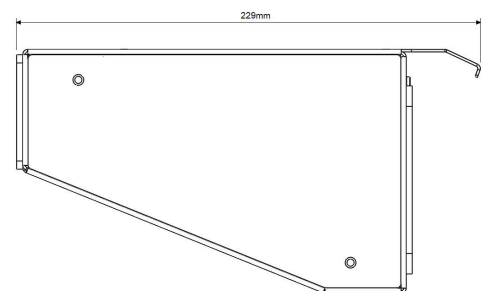

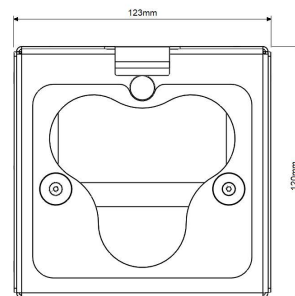

Recalibration takes around one minute and is fully automated using the TalentumTT² 's on-board microprocessor which calculates the optimum settings.

Specification

Suitability	Talentum UV, UV/IR2, IR2, IR3
Material	Aluminium
Weight	430g
Dimensions	120 x 120 x 190mm
Ingress protection rating	IP11
Connectivity	USB type C to Talentum
Latching mechanism	Magnetic
Operating temperature	-10°C to +55°C
Storage temperature	-20°C to +65°C

Dimensions

Ordering codes:

- 1800-101** TalentumTT² without calibration kit
- 1800-013** Replacement Diffuser Cartridge
- 1800-015** Replacement Calibration Interface Cable

Installation Recommendations

Please refer to our User Manual for usage of the TalentumTT².

FFE Ltd assumes no responsibility for their use. Data and design are subject to change without notice. Installation and wiring instructions are shipped with the products and should always be used for actual installation. For more information, contact your Sales Representative.
